

**ULTRA-BATTEN PANELS**

**PRODUCT FEATURES**

- Simple, non-directional design
- Perfect for residential or light commercial applications
- One-piece, concealed anchor clip
- No mechanical seaming required

A good choice for residential or light duty commercial applications, Ultra-Batten is especially useful where non-directional installation is required. The simple two piece pan and seam cap design allows for two-way installation and is particularly flexible where transitions are required.

Typically recommended for applications having a 3:12 pitch or greater, Ultra-Batten must be installed over a waterproofed solid substrate and is a very good choice for mansard or canopy applications. Please contact Coated Metals Group for complete test results, load tables and specifications.

**ULTRA-BATTEN**
