

**ULTRA-FLUSH PANELS**

**PRODUCT FEATURES**

- Clean, flush appearance
- Concealed anchors
- Suitable for liner, soffit or fascia panel
- Quick & easy installation
- Can be vented for soffit applications
- Optional Stiffening Beads available

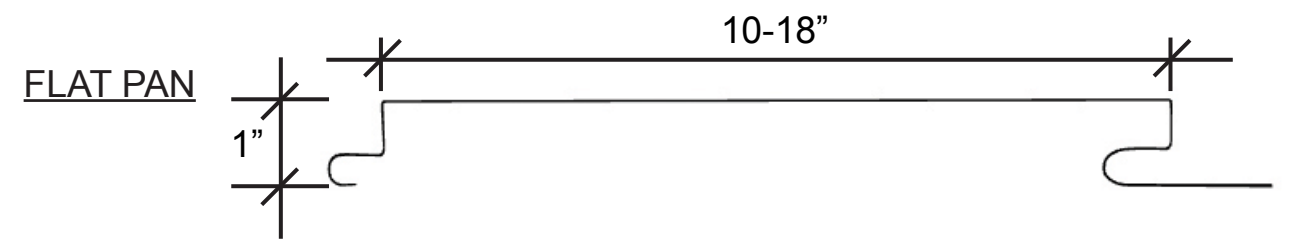

Ultra-Flush panels are ideal for soffit, liner or fascia applications where a clean, flush appearance is desired. Ultra-Flush's 1" deep profile is designed to provide concealed anchoring, excellent rigidity and a positive, interlocking joint. The panel is available in a variety of widths and can be vented for soffit applications. One or two stiffening beads are available upon request. Ultra-Flush panels are intended for use in soffit and vertical wall applications and are not to be used for roofing.
