Product Overview:

CMG's Ultra Low Gloss PVDF is a new low-gloss, low-sheen finish line for the metal roofing and construction industry. Featuring ultra-low light reflectance ratings backed by Dura Coat's premium Durapon 70™ Full-Strength 70% PVDF resins and proprietary ultra-durable acrylic coatings. Offered in 7 standard stocked colors, Ultra Low Gloss is also available in custom color match applications.

FAQ:

What warranty does Ultra Low Gloss carry?

- Ultra Low Gloss PVDF offers a 40-year finish warranty. The same warranty issued for other CMG Full-Strength 70% PVDF finishes.

Does Ultra Low Gloss offer any performance benefits?

- Ultra Low Gloss PVDF minimizes oil-canning and light glare and carries superior durability in abrasion testing to similar low-gloss SMP paint finishes.

What gauges and widths are offered?

- Ultra Low Gloss PVDF is available in standard 40" and 48" master coil widths over 24ga substrate for a wide variety of efficient coil slitting options

Are touch-up paints available?

- Color-matched PVDF paint pens for scratch repairs are stocked and available. Larger formats available upon request

Are other colors offered?

- Ultra Low Gloss PVDF is available for custom color matching. Please contact your local sales representative for further information.

Colors represented on this electronic chart may not exactly match actual material. All colors should be verified using actual metal samples. Mismatch of electronic representations and actual material shall not be accepted as cause for rejection. Many finishes are production batch-specific and may result in slight variations in visual match. Do not mix or use materials purchased from separate sales orders on individual projects. Visual variation between separate order batches used on individual projects shall not constitute cause for rejection or claim.

| Slate Gray | 24ga | 40" / 48" | 36 | 34.70% | 0.84 |

Durapon 70 Low Gloss Low Sheen

Durapon 70™ is a full 70% PVDF coating that incorporates a unique acrylic blend designed to produce a harder, tougher surface that resists abrasion and scratching that can occur in transit, handling, and installation. Durapon 70™ colors are matched with cool pigments to meet Energy Star requirements and qualify for LEED's certification. In addition, Durapon 70™ can match most colors in the spectrum including metallics which utilize mica flakes. This high-performance coating is engineered to reduce the carbon footprint and lower the heat island effect.

Tip: Always consult your CMG Sales Representative when deciding between different finish options for your project

More: CMG has many more documents and informational tools available on our website. If you can't find what you're looking for, give us a call!
