## MATERIAL SAMPLES

Material samples are just a scan away! Use the QR code to the right to request yours today. See the richness of color, feel the strength of the finish, and watch how the surface transforms in the light.

## CUSTOM COLORS

Don't see what you're looking for? Our custom program allows architects and fabricators to specify colors and coatings beyond our standard palette. Custom options are engineered to meet the same rigorous testing, durability standards, and long-term performance expectations as our stocked finishes.

**Durapon 70**  
Ceranamel XT-40S

**AMERICAN MADE**  
**EMPLOYEE OWNED**

**40 YEAR**  
**WARRANTY**

**GREEN**  
**METAL**  
**ROOFING**

ULTRA LOW GLOSS FINISHES

Dura Coat Durapon 70 Full Strength 70% PVDF  
Refined ultra matte finishes that minimize glare and visual appearance of oil-canning

TEXTUR3D FINISHES

Dura Coat Ceranamel XT-40S SMP  
Tactile finishes that capture light, creating bold texture and dimensional appeal

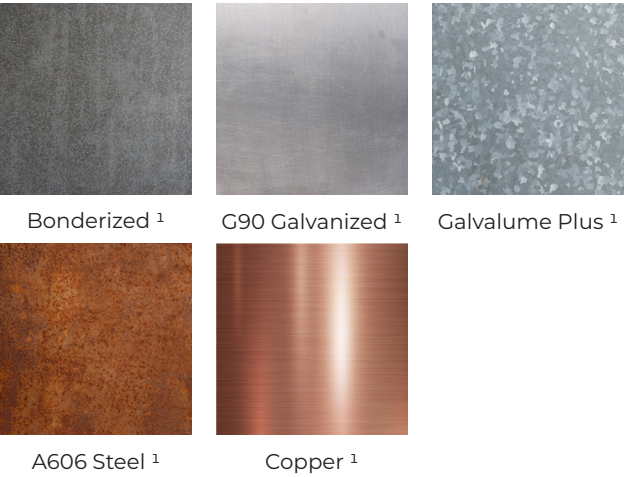

PREMIUM FINISHES

Dura Coat Durapon 70 PVDF and Ceranamel XT-40S SMP  
Ultra durable coatings mimicking natural materials

NATURAL MATERIALS

Organic roofing and construction materials  
Distinctive, enduring, and uniquely yours

Colors represented on this chart or in any electronic format may not exactly match actual material. All materials and finishes should be verified using physical metal samples prior to selection or installation. Many finishes are production-batch specific and may exhibit slight variation. Materials from separate sales orders should not be mixed on the same project. Visual differences between batches, electronic representations, or marketing imagery shall not constitute cause for rejection or claim. Oil-canning is an inherent characteristic of flat-rolled metal and is not cause for rejection. CMG assumes no responsibility for oil-canning or its possible appearance in the finished installation. Material samples and additional custom colors are available upon request. Please refer to the Stock Availability matrix for gauge, width, and paint finish availability. Color and sizes can change without notice. Additional sizes, gauges, and colors may be available, please contact your local sales representative for more information.

<sup>1</sup> Natural Materials, including Copper, Bonderized, A606 Weathering Steel, Galvalume Plus, and G90 Galvanized, are inherently variable products that may develop a natural patina over time. These materials may exhibit visual differences in color, tone, sheen, and texture between material samples, production batches, and as they weather in the field. Such variation is a natural characteristic of the material and should be expected. While these products are manufactured to meet high standards of quality and long-term performance, standard finish warranties do not apply. CMG expressly disclaims any liability for visual differences between material samples, color charts, promotional images, and delivered products.
